

What is subitizing? The ability to see a number immediately without counting.

How do I subitize? Flash (1-2 seconds) the picture and begin to ask questions. Repeat

Questions to Ask:

How many did you see?

How did you see that?

How many more do you need to make 10?

How do you know?

How many more do you need to make a number 11-19 (pick 1 number)?

How did you see that?

What number comes before? OR What is 1 more than the number of dots?

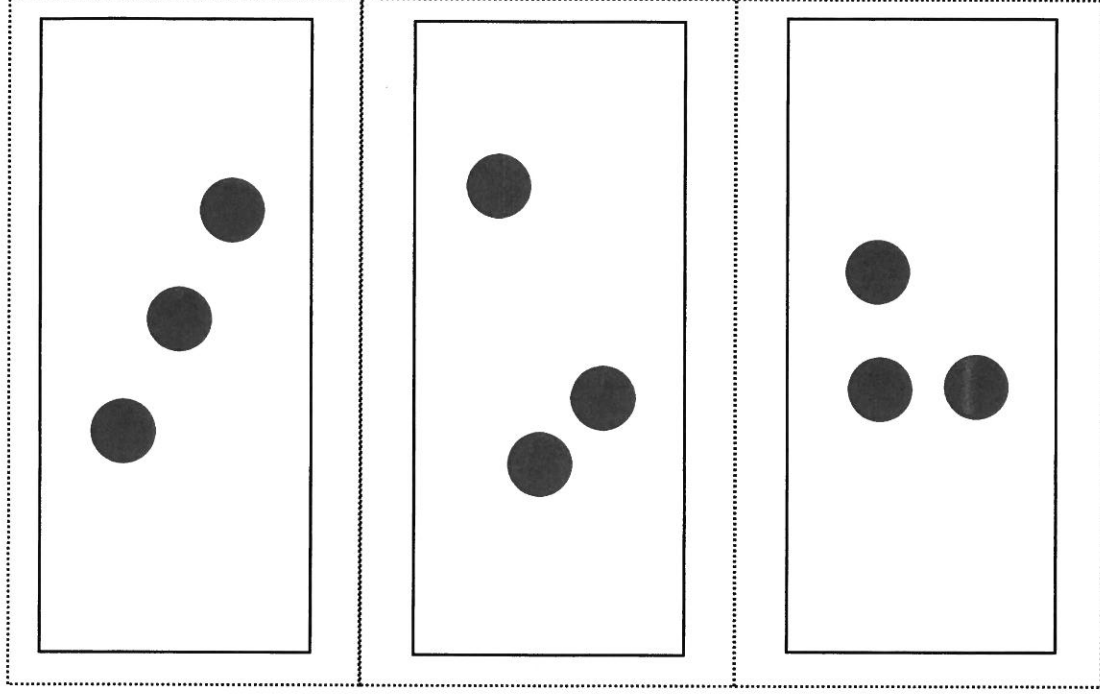

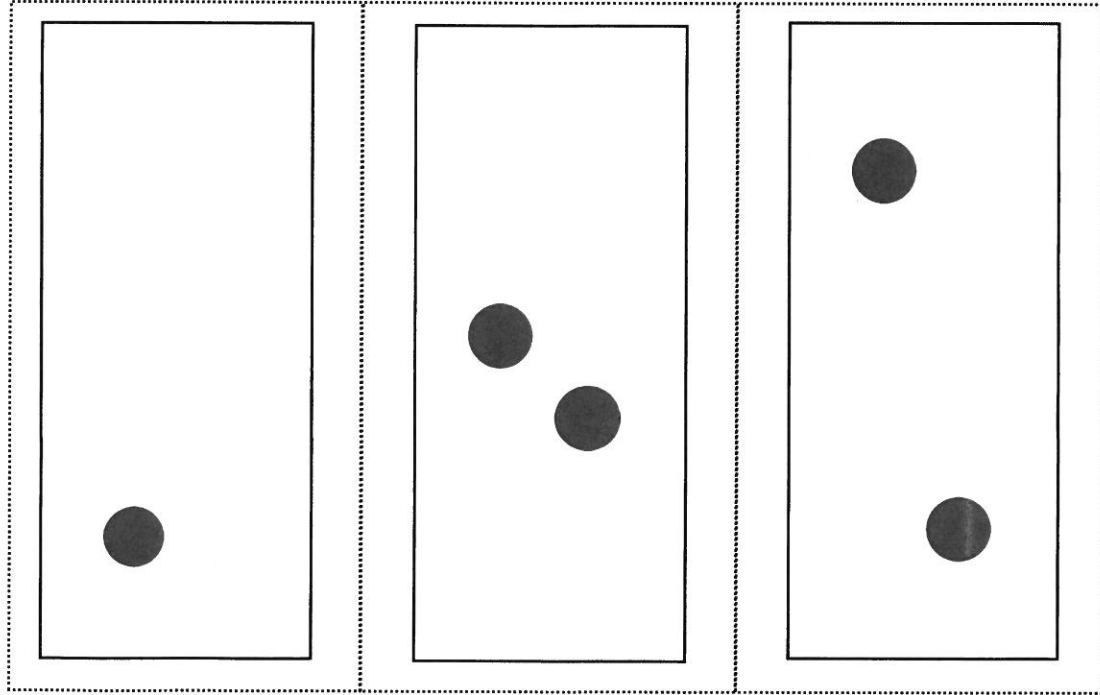

What number comes after? OR What is 1 less than then number of dots?

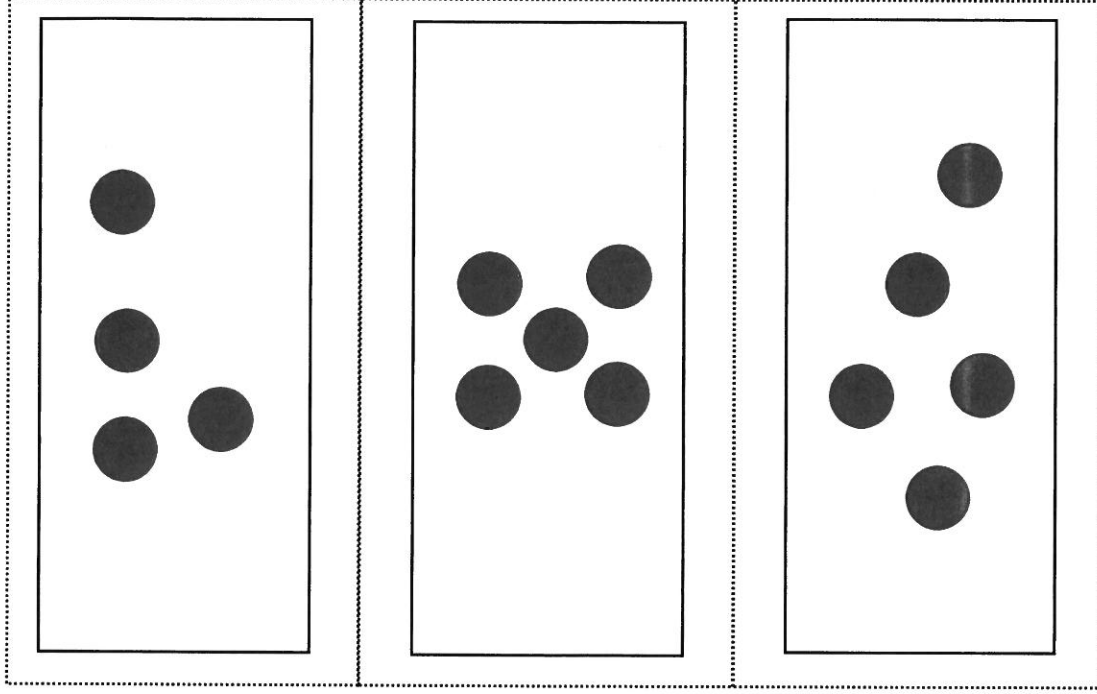

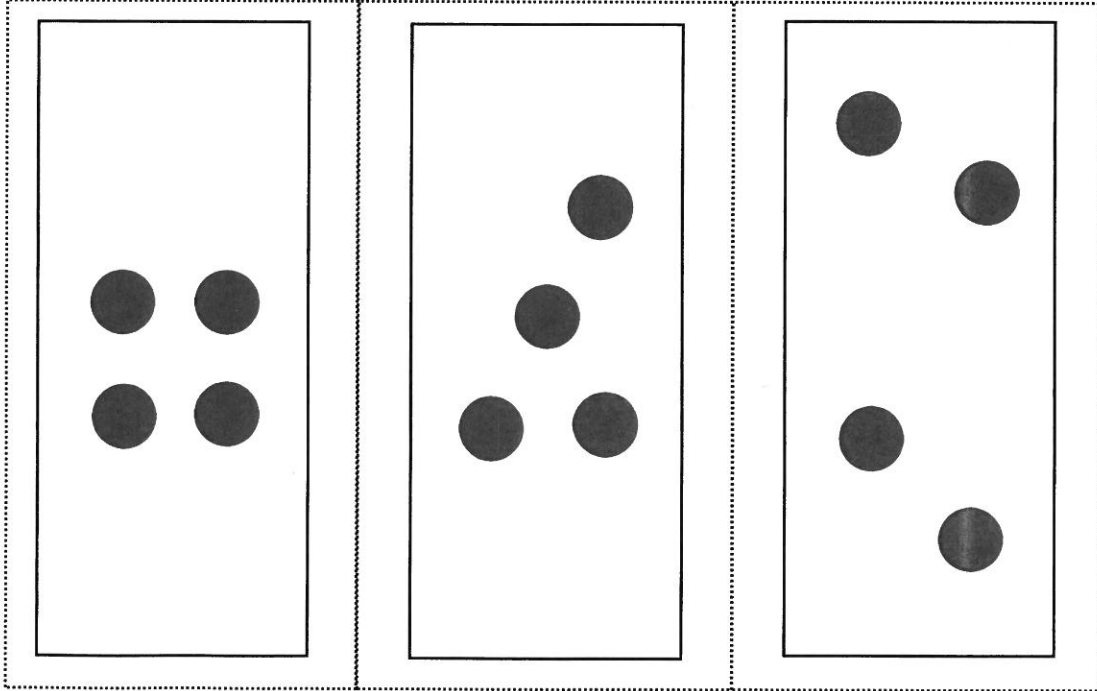

What numbers is 2 numbers after? OR What is 2 more than the number of dots?

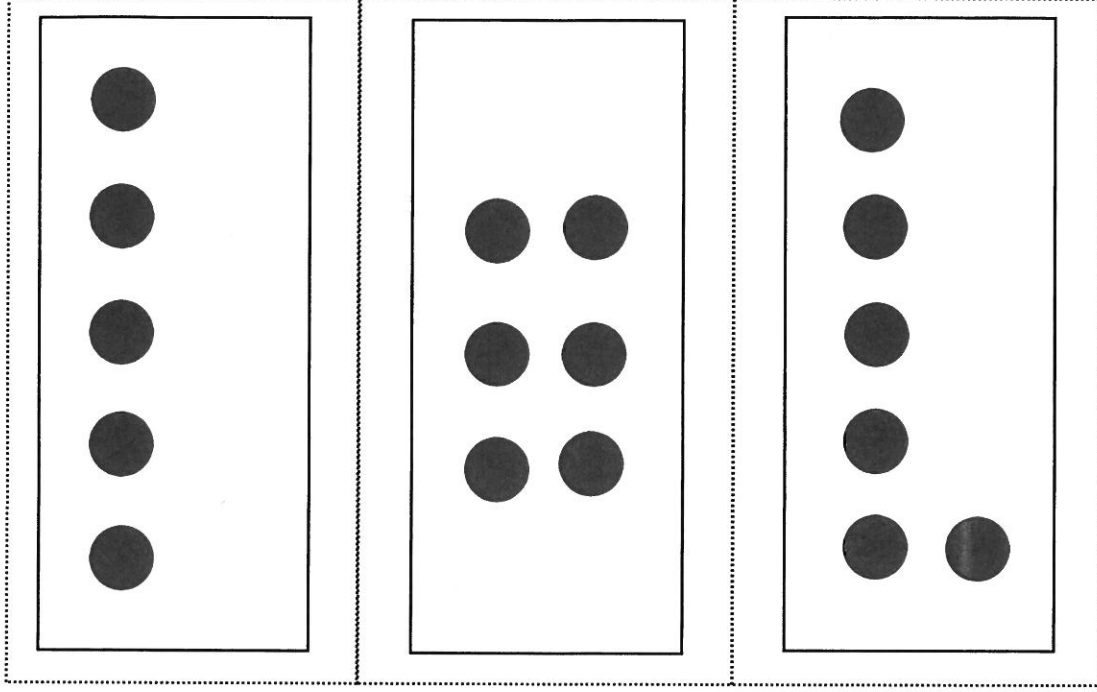

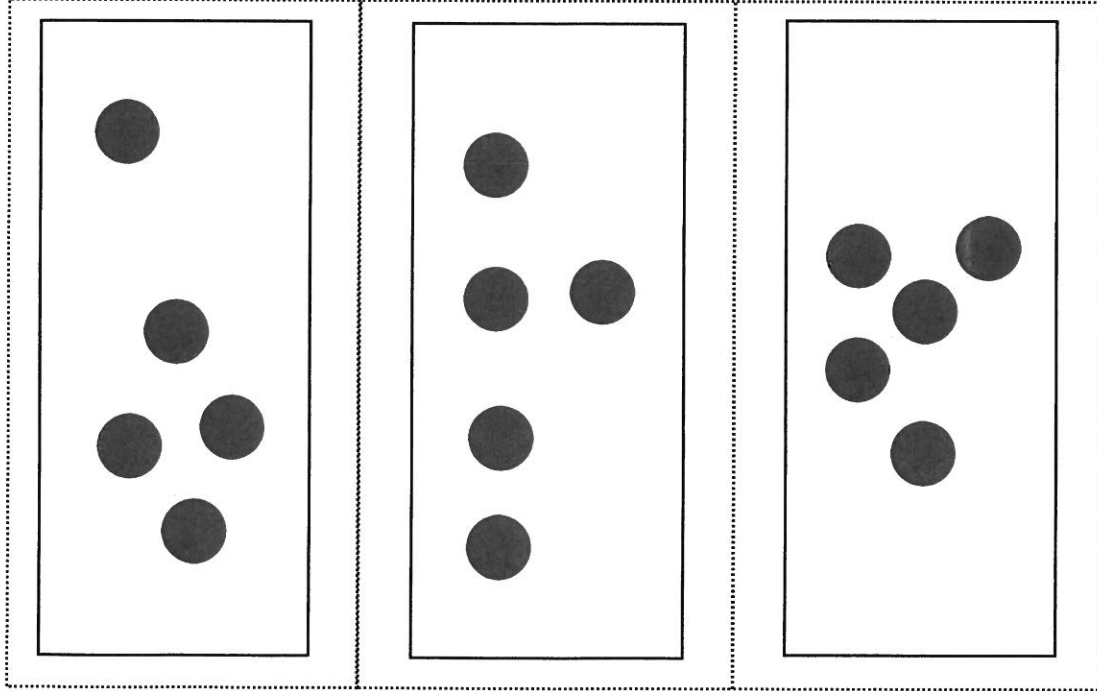

What number comes 2 before the dots? OR What is 2 less than the number of dots?

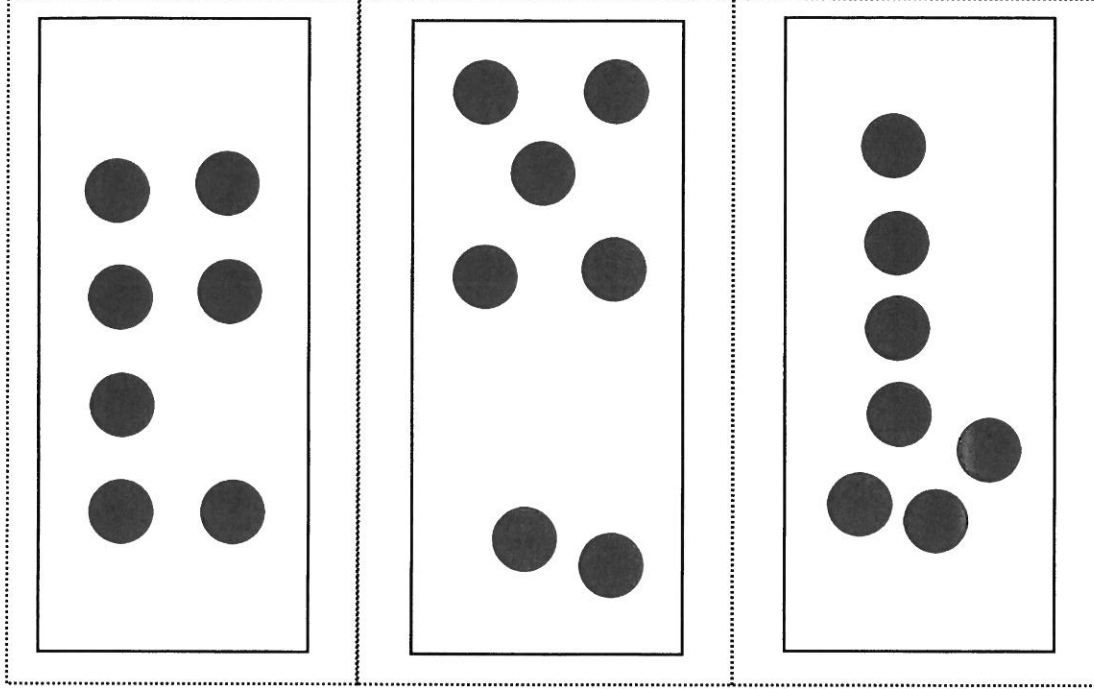

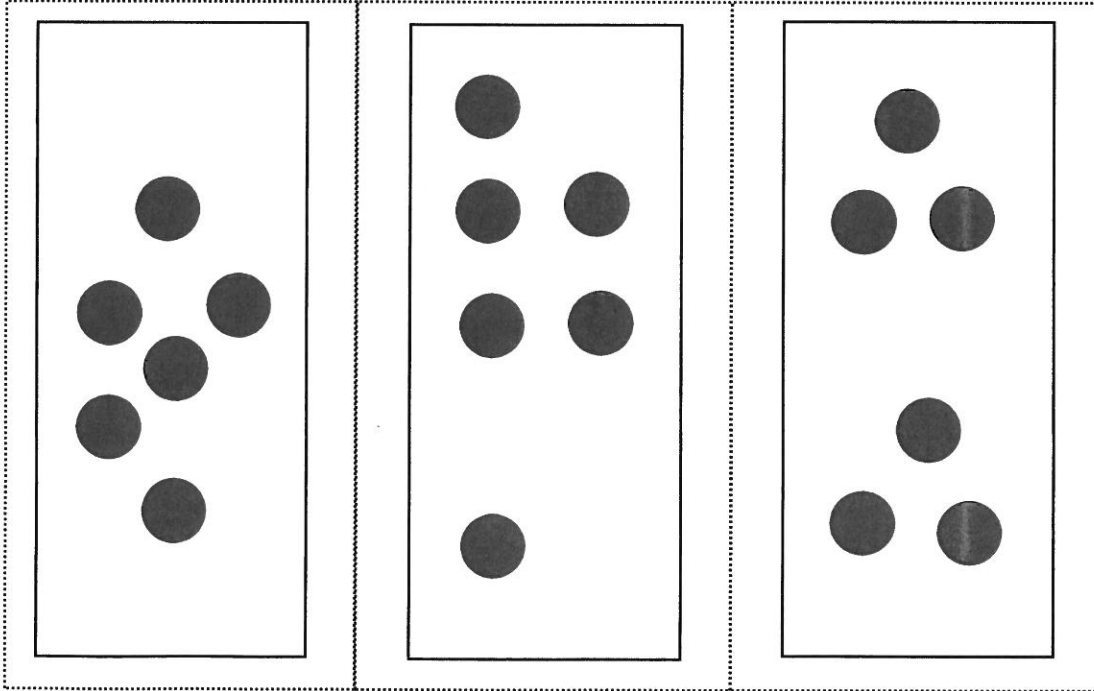

What number comes 10 after the number of dots? OR What is 10 more than the number?

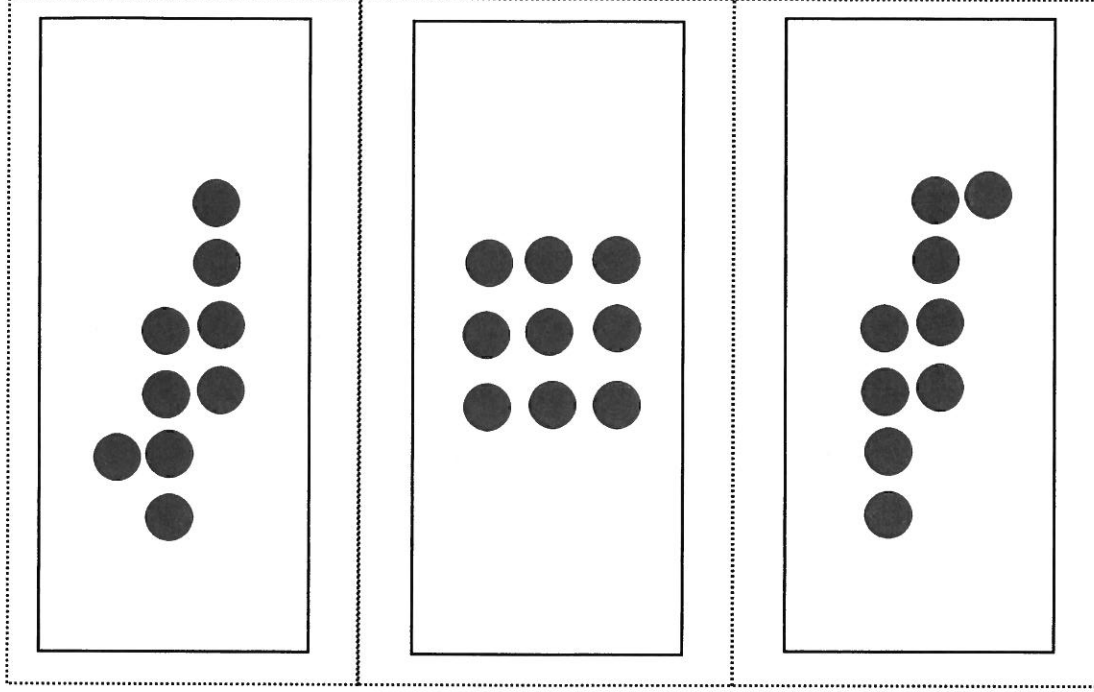

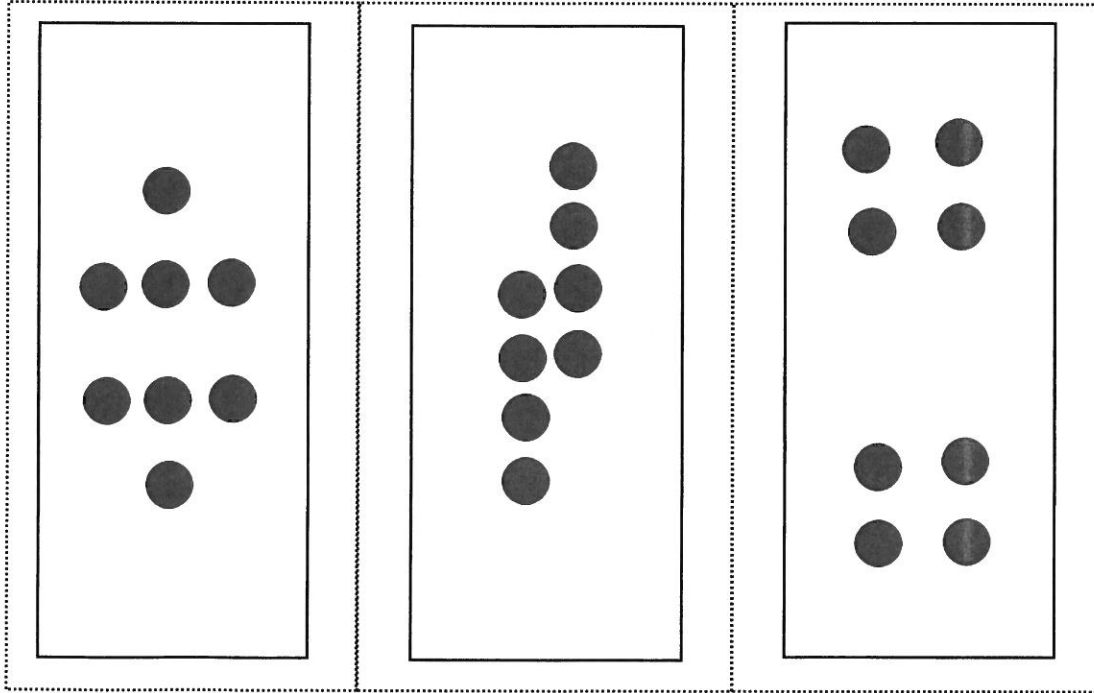

If you doubled the number of dots, what would I have?
